

CUMULATIVE INDEX 2000

Volume 18

March	GERIATRIC ANESTHESIA, pages 1-215
June	REGIONAL ANESTHESIA, pages 217-493
September	PERIOPERATIVE MEDICINE, pages 495-703
December	ANESTHESIA AND RENAL CONSIDERATIONS, pages 705-994

Note: Page numbers of article and issue titles are in **boldface** type

- Accounting, in business of perioperative medicine, 679-684
- Acetaminophen, as analgesic agent in palliative care, 187
- Acid-base and electrolyte changes, physiologic, in acute and chronic renal failure patients, **809-833**
- hyperkalemia, 819-821, 822
- hypermagnesemia, 828-829
- hypernatremia, 817-819
- hyperphosphatemia, 829-830
- hypocalcemia, 821, 823-826
- hypomagnesemia, 826-828
- hyponatremia, 813-817
- metabolic acidosis, 810-813
- Acute care medicine, community hospital practice, **539-550**
- availability of services, 544
- critical care, 543-544
- hospital organization involvement, 544-545
- intraoperative care, 541
- opportunities for anesthesiologists in acute care hospitals, 547
- postoperative care, 542
- preoperative evaluation clinic, 540-541
- recruiting and training of anesthesiologists, 545
- success of perioperative medicine, 545-547
- surgical clinical pathways, 542-543
- uncertain future for anesthesiology, 549-550
- working with hospitalist teams, 547-549
- Acute cortical necrosis, in pathogenesis of renal insufficiency, 779
- Acute tubular necrosis, in pathogenesis of renal insufficiency, 778-779
- prerenal syndrome and, interface between, 741-742
- as vasomotor nephropathy, 798-799
- Adenosine, in cardiopulmonary resuscitation in the elderly, 152
- Advance care planning, 201
- Advanced age, as risk factor for acute renal failure, 707
- Advance directives, 164-167, 201
- Airway(s), in geriatric patients, and effect on cardiopulmonary resuscitation, 148-149
- upper and lower, structural alterations in, in elderly, 48-49
- Albumin, in kidney transplant surgery, 935-937
- Alfentanil, as opioid analgesic, 261
- pharmacology of, in elderly patients, 14-15
- Ambulation, with neuraxial labor analgesia, 392-393
- Ambulatory surgery, outcomes research in, 639-640
- regional anesthesia for, **341-353**
- advantages of, 341-342
- paravertebral block, 347-348
- techniques, 342-347
- thoracic paravertebral block, 352-353
- spinal anesthesia for, 237
- Amides, for local anesthesia, bupivacaine, 228-229
- dibucaine, 229-230
- etidocaine, 229
- levobupivacaine, 230
- lidocaine, 226-227

Amides (*Continued*)

- mepivacaine, 227-228
- prilocaine, 229
- ropivacaine, 230
- Aminosteroids, for renal preservation, 764
- Amiodarone, in cardiopulmonary resuscitation in the elderly, 153
- Ammonia toxicity, as complication of transurethral resection of prostate, 892-893
- Analgesia, balanced, 585
 - labor. *See Labor analgesia.*
 - pre-emptive, 585
 - from regional anesthesia, 98
- Analgesics, nonopioid, for postoperative pain management, in pediatric patients, 622-623
 - non-opioid, in palliative care, 187, 189
 - opioid, in palliative care, 189-194
 - for postoperative pain management, in pediatric patients, 624-626
- Anaritide, for prevention of acute renal failure, 713
- Anemia, chronic, preoperative evaluation, for kidney transplant surgery, 925-926
 - in patients with chronic renal failure, 869
- Anesthesiologists, opportunities for, in acute care hospitals, 547
 - recruiting and training, in community hospital practice, 545
- Anesthesiology, common problem and special problem in, 519-520
 - outcomes in perioperative medicine and, 633-645. *See also Perioperative medicine, and anesthesiology.*
- Anesthetic drugs, pharmacology of, in elderly patients. *See Pharmacology of anesthetic drugs, in elderly patients.*
- Aneurysm, abdominal aortic, after extracorporeal shock wave lithotripsy, 963-964
- Angiotensin-converting enzyme inhibitors, vasomotor nephropathy from, 804-805
- Ankle, nerve blocks at, 333-334
- Anterior spinal artery syndrome, as complication of spinal and epidural anesthesia, 468
- Antiarrhythmics, in cardiopulmonary resuscitation in the elderly, 152-153
- Anticoagulation, oral, spinal hematoma and, 472-473
 - spinal anesthesia and, 238-239
- Antimicrobial agents, as risk factor for acute renal failure, 708
- Antiplatelet medications, spinal hematoma and, 473-474
- Anuria, intraoperative, causes of, in kidney transplant surgery, 939-940
- Aortic cross-clamping, as risk factor for acute renal failure, 710
- Aortic stents, endovascular, for prevention of renal failure, 733-734
- Aortic surgery, difficulties with assessing literature on perioperative renal protection during, 725-726
 - difficulties with intraoperative assessment of renal function during, 720-723
 - intraoperative management of renal function during, 719-737
 - with endovascular aortic stents, 733-734
 - historical perspective, 719-720
 - with kidney perfusate, 732-733
 - with pharmacologic agents, calcium channel blockers, 731
 - dopamine, 729-731
 - furosemide, 728-729
 - mannitol, 726-728
 - with volume loading, 731-732
 - renal dysfunction caused by, 723-725
- Apnea, as intubation-related complication, in pediatric patients, 616-617
 - postoperative, in premature infants, 604-605
 - as risk for anesthesia in pediatric patients, 606-607
- Arginine vasopressin, for septic shock, 801-802
 - vasoconstrictor response and, 794-795
- Arrhythmias, in patients with chronic renal failure, 879
- Arterial stiffening, as effect of cardiovascular and autonomic aging, 35-36
- Arthritis, affecting positioning of aged patients, 108-109
- Artificial nutrition and hydration, in terminally ill, 202-203
- Asthma, as risk for anesthesia in pediatric patients, 603-604
- Atracurium, pharmacology of, in elderly patients, 23
- Atrial natriuretic peptide, for oliguria, 747-748
 - for renal preservation, 759-761
 - vasodilator response and, 796
- Atrial natriuretic peptide analogues, for prevention of acute renal failure, 713
- Atropine, decreased response to, as effect of cardiovascular and autonomic aging, 38
- Autonomic and cardiovascular function, in geriatric patient, 31-46
 - effects of anesthesia and hemodynamic management, 40-43
 - management of hypotension, 42-43

- mechanisms of cardiovascular and autonomic aging, changes in sympathetic nervous system, 38-39
 - connective tissue stiffening, 35-38
 - decreased beta-receptor responsiveness, 32-35
 - decreased response to atropine, 38
- Axillary blockade, for upper extremity regional anesthesia, 311-312
- Back pain, lower, management of, in geriatric patients, 128-131
- Bacteremia, transient, as complication of transurethral resection of prostate, 893
- Benzocaine, for local anesthesia, 226
- Bereavement, 203-204
- Beta-receptor responsiveness, decreased, as effect of cardiovascular aging, 32-35
- Bladder, neuroanatomy of, 885-886
 - perforation of, as complication of transurethral resection of prostate, 893
- Bleeding, as complication of transurethral resection of prostate, 894
- Blockade of stellate ganglion, for chronic pain management, 442-445
- Blood loss, with epidural anesthesia and analgesia, 423
- Blood transfusion, preoperative, for patients with chronic renal failure, 874-875
- Bowel, affected by extracorporeal shock wave lithotripsy, 963
- Bowel obstruction, in terminally ill patients, 196
- Brachial plexus block, in pediatrics, 371-372
- Brain damage, as cause of CNS dysfunction after anesthesia, 60
- Bronchopulmonary dysplasia, as risk for anesthesia in pediatric patients, 605-606
- Bupivacaine, for epidural anesthesia, 260, 261
 - for local anesthesia, 228-229
 - for spinal anesthesia, 235-236, 241
 - transient neurologic symptoms from, 235-236, 238
- Burn surgery, as risk factor for acute renal failure, 710
- Calcium channel antagonists, in kidney transplant surgery, 938
- Calcium channel blockers, for prevention of renal failure, 713, 731
 - for renal preservation, 753-757
- Cardiac disease, preoperative evaluation, for kidney transplant surgery, 922
- Cardiac dysfunction, as risk factor for acute renal failure, 707
- Cardiac stiffening, as effect of cardiovascular and autonomic aging, 37-38
- Cardiopulmonary bypass, as risk factor for acute renal failure, 710
 - vasomotor nephropathy from, 803-804
- Cardiopulmonary resuscitation, decision not to initiate, in terminally ill, 202
 - management of, **143-158**
 - outcome of, in elderly patients, 144-147
 - patients' expectations, 154
 - physiologic changes with aging and effects on, 147-153
 - airway, 148-149
 - cerebral protection, 153
 - circulation, 149-150
 - drug therapy, 150-153
- Cardiovascular complications, from kidney transplant surgery, 940
- Cardiovascular disease, outcomes research in, 638-639
 - in patients with chronic renal failure, 868
- Cardiovascular function, autonomic and, in geriatric patient. *See Autonomic and cardiovascular function, in geriatric patient.*
- Case-controlled trials, in outcomes research, 636
- Catheters, for combined spinal-epidural technique, risk of penetration from, 276-277
 - for epidural anesthesia, 252
 - insertion techniques, 252-254
 - verification of location, 254-255
- Caudal anesthesia, for transurethral resection of prostate, 888
- Caudal block, in pediatrics, 356-359
 - dosing, 358-359
 - equipment, 357
 - risks, complications, contraindications, 359
 - technique, 357-358
- Celiac plexus block, for chronic pain management, 447-452
- Central nervous system dysfunction after anesthesia, in geriatric patient, **59-70**
 - clinical presentations, abnormal reflexes, 63
 - cognitive dysfunction after cardiac surgery, 64
 - cognitive dysfunction after non-cardiac surgery, 64-65
 - death, 62-63
 - delirium, 63-64

- Central nervous system dysfunction after anesthesia (*Continued*)
- ISPOCD study, 65
 - methodologic problems in the detection of cognitive dysfunction, 65
 - postoperative cognitive dysfunction, 64
 - stroke, 63
 - mechanisms of, extensive loss of brain tissue, 60
 - hypoperfusion, 60-61
 - hypoxemia, 61
 - infarction, 60
 - risk factors, 61-62
 - spinal cord damage associated with central blocks, 62
 - prevention of, 66
- Cerebral death, from CNS damage during anesthesia, 62-63
- Cerebral protection, in cardiopulmonary resuscitation in the elderly, 153
- Cervical facet, median branch blocks, for chronic pain management, 432, 434-435
- Cesarean section, combined spinal-epidural block for, 269-273
- general vs. regional anesthesia for, 395-396
 - postcesarean analgesia for, 396-397
 - spinal vs. epidural anesthesia for, 396
- Chemotherapeutic-immunosuppressive agents, as risk factor for acute renal failure, 708
- Children. *See Pediatric patients; Pediatrics.*
- 2-Chloroprocaine, for local anesthesia, 225
- Chronic pain management, common nerve blocks in. *See Nerve blocks, common, in chronic pain management.*
- Circulation, in geriatric patients, and effect on cardiopulmonary resuscitation, 149-150
- Circulatory overload, as complication of transurethral resection of prostate, 891-892
- Cisatracurium, pharmacology of, in elderly patients, 24
- Clonidine, in epidural anesthesia, 262
- with local anesthetics for lower extremity nerve blocks, 337
 - for prolonging upper extremity nerve blocks, 306-307
 - with spinal anesthesia, 246
- Coagulation, neuraxial labor analgesia and, 393-394
- Coagulopathy, as complication of transurethral resection of prostate, 894
- correction of, for patients with chronic renal failure, 875
 - uremic, preoperative evaluation, for kidney transplant surgery, 926-927
- Cocaine, for local anesthesia, 226
- Codeine, in palliative care, 190
- Cognitive dysfunction, from CNS dysfunction after anesthesia, 64-65
- Cohort studies, prospective, in outcomes research, 635
- retrospective, in outcomes research, 636
- Combined spinal-epidural technique, 267-295
- clinical experience with, 268-276
 - for cesarean section, 269-273
 - for day case surgery, 269
 - for general surgery, 268
 - in labor, 273-276
 - for orthopedic surgery, 269
 - controversial aspects of, controlling upper level of block, 277-278
 - decreased risk of postdural puncture headache, 282-284
 - epidural test-doses, 284-285
 - fetal and neonatal effects, 281
 - pressure changes in epidural and subarachnoid spaces, 279-281
 - risk of catheter penetration through dural hole, 276-277
 - risk of meningitis, 281-282
 - transdural drug transport, 278-279
 - for labor, 387
 - special equipment for, 285-287
- Complement system, modulation of, for renal preservation, 763-764
- Conduction blockade, physiology of, 218-219
- Congestive heart failure, preoperative evaluation, for kidney transplant surgery, 922-923
- Connective tissue stiffening, as effect of cardiovascular and autonomic aging, 35-38
- Constipation, in terminally ill patients, 194-195
- Continuity of care, in perioperative medicine program, 525
- Continuous regional anesthesia, for ambulatory surgery, 348-350
- Contoured supine position, advantages of, in aged patients, 116-117
- Convection, in dialysis, 855
- Coronary artery disease, preoperative evaluation, for kidney transplant surgery, 922
- Corticosteroid therapy, as risk for anesthesia in pediatric patients, 609
- Cough, in terminally ill patients, 197-198
- Critical care, in community hospital practice, 543-544
- and perioperative medicine, 527-538
 - current perspective, 529-530
 - current state of the specialty, 530-531
 - demographic changes and practitioner requirements, 529

- historical perspective, 527-529
- practice models, 533-536
- training paradigm, 531-533
- in perioperative medicine program, 524-525
- Croup, postintubation, in pediatric patients, 617
- Cryosurgery, as alternative to transurethral resection of prostate, 895
- Cyclosporine A, vasomotor nephropathy from, 805
- Cystectomy, radical, anesthetic considerations, 902
 - preoperative considerations, 901-902
 - radical prostatectomy, nephrectomy, pheochromocytoma, and laparoscopic procedures, anesthesia for, 899-917
- Data-analysis, in outcomes research, 635-637
- Databases, in outcomes research, 636-637
- Data management, for perioperative medicine practice, 647-661
 - constructing a perioperative information system, 649-650
 - electronic record design and implementation issues, data standards and information coding, 655-656
 - hardware issues, 658-659
 - purchase or develop a system, 658
 - security, 656-658
 - selecting important data, 656
 - training and implementation issues, 659-660
- goals of data collection, 647-649
 - care documentation and professional billing, 648
 - evidence-based medicine, 649
- systems for recording and reporting perioperative information, advanced solution, 652-655
 - intermediate solution, 651-652
 - simple solution, 650-651
- Day case surgery, combined spinal-epidural block for, 269
- Decision analysis, in business of perioperative medicine, 689-690
- Decubiti, as complication of positioning aged patients, 113-114
- Delirium, from CNS dysfunction after anesthesia, 63-64
 - in terminally ill patients, 200
- Dementia, in terminally ill patients, 199-200
- Depression, in terminally ill patients, 198-199
- Diabetes, complications from, in kidney transplant surgery, 941-942
 - preoperative evaluation, for kidney transplant surgery, 923-924
- Dialysis, 853-862
 - acute and chronic fluid shifts, 859-860
 - basic mechanisms of, 853, 855
 - convection, 855
 - diffusion, 855
 - osmosis, 855
 - for chronic renal failure, 874, 880
 - forms of therapy in, hemodiafiltration, 854, 857
 - hemodialysis, 855-857
 - hemofiltration, 854, 857
 - peritoneal dialysis, 858
 - ultrafiltration, 854, 857-858
 - intermittent vs. continuous therapy, 858-859
 - for renal insufficiency, 784-785
 - surgery in patients on, 860-861
- Diarrhea, in terminally ill patients, 196
- Dibucaine, for local anesthesia, 229-230
- Diffusion, in dialysis, 855
- Diltiazem, for renal preservation, 756-757
- Diuretic resistance, strategies for overcoming, 749-750
 - types of, 748-749
- Diuretics, classification of, 745
 - in kidney transplant surgery, 937-938
 - loop, for oliguria, 746
 - for renal insufficiency, 783
 - for oliguria, atrial natriuretic peptide, 747-748
 - dopamine, 746-747
 - dopaminergic agonists, 746
 - fenoldopam, 747
 - loop diuretics, 746
 - mannitol, 744, 746
 - renal benefits, 744
- Dobutamine, dopamine used with, 846
- Do-not-resuscitate orders in operating room, for geriatric patients, 167-171
- Dopamine, for intraoperative prevention of renal failure, 729-731
 - in kidney transplant surgery, 938-939
 - low-dose "renal," 835-851
 - animal studies, 841
 - in combination therapy, 846
 - in crossover trial, 846
 - equivocal evidence, 841, 845
 - for established acute renal failure, 845-846
 - history, 836
 - and oliguric vs. nonoliguric renal failure, 841
 - in patients at risk for acute renal failure, 845
 - pharmacodynamics, 837-840
 - pharmacokinetics, 836-837

Dopamine (*Continued*)

- positive evidence for, 841, 842-844
 - rationale for use, 840
 - side effects, 840-841
 - statistical power of renal dopamine studies, 845
 - in management of renal insufficiency, 783
 - for oliguria, 746-747
 - for prevention of acute renal failure, 712
- Dopamine, agonists, for renal preservation, 761-763
- Dopaminergic agonists, for oliguria, 746
- Dopexamine, in kidney transplant surgery, 939
- Dysphagia, from intrathecal analgesia, 388-389
- Dyspnea, in terminally ill patients, 196-197

Edema, pulmonary, in postoperative pediatric patients, 618-619

- Edmonton symptom assessment scale, 186
- Electrolyte balance, fluid and, in patients with chronic renal failure, 864-868

Electrolyte changes, physiologic acid base and. *See Acid-base and electrolyte changes, physiologic, in acute and chronic renal failure patients.*

Emergence phenomena, after general anesthesia, in pediatric patients, 615-616

- End of life issues, anesthesiologist's involvement in, 172-175
- palliative care and. *See Palliative care, and end of life issues.*

Endovascular aortic stents, for prevention of renal failure, 733-734

End-stage liver disease, in pathogenesis of renal insufficiency, 779-780

Epidural abscess, after epidural anesthesia, 477-478, 480

- Epidural analgesia, for labor, epidural test dose, 391-392
- individualized approach to, 390-391
- low dose techniques and patient-controlled epidural analgesia, 389-390

in perioperative pain management, 581-582

- complications, 583-584
- controversial issues, 584
- potential benefits, 582-583

Epidural anesthesia, and analgesia, new developments in, 251-266

- anesthetic and analgesic drugs, 259-263
- liposome-encapsulated analgesics, 263

- local anesthetic drugs, 260-261
 - novel analgesic drugs, 261-262
 - opioid analgesics, 261
 - equipment, catheters, 252
 - needles, 251-252
 - methods of determining extent of epidural anesthesia, 257-258
 - patient-controlled epidural analgesia, 258-259
 - techniques, epidural radiographs and epiduroscopy, 256-257
 - epidural saline injection to hasten return of postoperative motor function, 255-256
 - needle and catheter insertion techniques, 252-254
 - unilateral epidural analgesia techniques, 255
 - verification of catheter location, 254-255
 - role of, in postoperative outcome, 407-428
 - benefits of IV-PCA, 409
 - blood loss and thromboembolism, 423
 - defining surgical outcome, 410
 - epidural issues, 409-410
 - gastrointestinal motility, 424-426
 - immune system, 423-424
 - neuroendocrine stress response, 421-423
 - pain relief, 408-409
 - physiologic sequelae of surgery, 408
 - pulmonary outcome, 418-421
 - regional vs. general anesthesia in vascular surgery, 410-413
 - thoracic epidural anesthesia and myocardial ischemia, 414-418
- complications of, 461-485
- anterior spinal artery syndrome, 468
 - incidence and etiology of, 462, 463
 - local anesthetic toxicity, 465-466
 - meningitis and spinal abscess, 474-478, 479-480
 - nerve injury from needle and catheter placement, 462, 464
 - neuraxial block in patients with preexisting neurologic disorders, 480-481
 - performance of neuraxial block in patients under anesthesia, 481-482
 - postdural puncture headache, 464-465
 - spinal hematoma, 468
 - antiplatelet medications, 473-474
 - intravenous and subcutaneous standard heparin, 470-471
 - low molecular weight heparin, 471-472
 - oral anticoagulants, 472-473

- transient neurologic symptoms, 466-468
- herpes simplex virus and, 478-479
- HIV and, 479
- vs. spinal anesthesia, for cesarean section, 396
- Epidural space, pressure changes in, from combined spinal-epidural technique, 279-281
- Epidural steroid injection, for chronic pain management, 438-439
- Epidural test-doses, with combined spinal-epidural technique, 284-285
- Epiduroscopy, 256-257
- Epinephrine, in cardiopulmonary resuscitation in the elderly, 150-151
 - with local anesthetics for lower extremity nerve blocks, 337
 - for prolonging upper extremity nerve blocks, 306
 - with spinal anesthesia, 245
- Esters, for local anesthesia, benzocaine, 226
 - 2-chloroprocaine, 225
 - cocaine, 226
 - procaine, 224
 - tetracaine, 225-226
- Ethical decisions in perioperative elder care, 159-181
 - advance directives, 164-167
 - anesthesiologist's involvement in end-of-life care, 172-175
 - anesthesiologist's stake in medical ethics, 176-177
 - do-not-resuscitate orders in operating room, 167-171
 - ethical principles and the concept of personhood, 160-162
 - informed consent, 162-164
 - resource allocation, 176
 - treatment redirection and palliative care, 171-172
 - views of aging, 159-160
- Etidocaine, for local anesthesia, 229
- Euthanasia, 172, 174, 175
- Extracorporeal shock wave lithotripsy,
 - anesthetic considerations for, in children, 961
 - immersion physiology and concerns, 960-961
 - pain, 956-960
- complications and special considerations, 961-964
 - bowel and spleen, 963
 - heart, 963
 - hypertension, 962-963
 - kidney, 962
 - vascular, 963-964
- fundamental lithotripter concepts, 954, 955-956
- and percutaneous nephrolithotomy, 953-971
- Facet blocks, for chronic pain management, 430-431
- Fasting guidelines, preoperative, for pediatric patients, 612-613
- Felodipine, for renal preservation, 755-756
- Femoral nerve block, 326, 328
 - complications, 329
 - in pediatrics, 372
 - technique, 328-329
- Fenoldopam, for oliguria, 747
 - for renal preservation, 761-763
- Fentanyl, as opioid analgesic, 261
 - in palliative care, 191-192
 - pharmacology of, in elderly patients, 14-15
 - with spinal anesthesia, 236, 245-246
- Fetal effects, from combined spinal-epidural technique, 281
- Fetal heart rate effects, of intrathecal analgesia, 387-388
- Finance, in business of perioperative medicine, 691-692
- Fluid and electrolyte balance, in patients with chronic renal failure, 864-868
- Fluid imbalance, in patients with chronic renal failure, 864
- Fluid resuscitation, impact of, on renal outcome, 741-742
- Furosemide, dopamine used with, 846
 - for prevention of renal failure, 712, 728-729
- Gas exchange, impaired efficiency of, in elderly, 52-53
- Gastric aspiration prophylaxis, for kidney transplant surgery, 928
- Gastrointestinal dysfunction, in patients with chronic renal failure, 870

- Spinal subarachnoid anesthesia, in pediatrics, 364-366
- dosing, 365-366
- risks and complications, 366
- technique, 365
- Spleen, affected by extracorporeal shock wave lithotripsy, 963
- Stents, endovascular aortic, for prevention of renal failure, 733-734
- Steroid therapy, as risk for anesthesia in pediatric patients, 609
- Stones, renal, treatment of. See *Extracorporeal shock wave lithotripsy and percutaneous nephrolithotomy.*
- Strategy, in business of perioperative medicine, 692-693
- Stroke, from CNS dysfunction after anesthesia, 63
- Subacute bacterial endocarditis prophylaxis, before surgery, in pediatric patients, 608
- Subarachnoid anesthesia, for transurethral resection of prostate, 888
- Subarachnoid space, pressure changes in, from combined spinal-epidural technique, 279-281
- Succinylcholine-induced myalgia, postoperative, in pediatric patients, 626
- Sufentanil, for epidural anesthesia, 260-261
- as opioid analgesic, 261
- pharmacology of, in elderly patients, 15-16

- for spinal anesthesia, 242
- Superior hypogastric plexus block, for chronic pain management, 452-454
- Supraclavicular block, for upper extremity regional anesthesia, 309-310
- Surgical clinical pathways, in community hospital practice, 542-543
- Surrogate endpoints, in outcomes research, 634-635
- Sympathetic nerve blocks, for chronic pain management, 442
- Sympathetic nervous system, changes in, as effect of cardiovascular and autonomic aging, 38-39
- Sympathoadrenal activation, vasoconstrictor response and, 792-793
- Telecardiology, 668-669
- Telecorrectional care, 669
- Teledermatology, 669
- Telemedicine, **663-676**
 - future perioperative medicine practice, 673-674
 - historical perspectives, 664-666
 - medicolegal issues, 673
 - primer, bandwidth, 666-667
 - education, 670-671
 - miscellaneous, 670
 - standards, 667
 - systems, 667
 - telecardiology, 668-669
 - telecorrectional care, 669
 - teledermatology, 669
 - telepathology, 668
 - telepsychiatry, 669
 - teleradiology, 667-668
 - telesurgery, 670
 - regulatory issues, 672
 - reimbursement, 671-672
- Telepathology, 668
- Telepsychiatry, 669
- Teleradiology, 667-668
- Telesurgery, 670
- Terminal sedation, 173-174
- Tetracaine, for local anesthesia, 225-226
 - for spinal anesthesia, 241
 - transient neurologic symptoms from, 238
- Thiopental, pharmacology of, in elderly patients, 5-6, 7, 8
- Thoracic epidural anesthesia, and myocardial ischemia, 414-418
- Thoracic paravertebral block, 352-353
- Thromboembolism, with epidural anesthesia and analgesia, 423
- Toxic nephropathy, in pathogenesis of renal insufficiency, 780-781
- Tramadol, in palliative care, 191
- Transdural drug transport, with combined spinal-epidural technique, 278-279
- Transient neurologic symptoms, as complication of spinal and epidural anesthesia, 466-468
 - from spinal anesthesia, 235, 236, 237-238
- Transplant surgery, kidney. *See* *Kidney transplant surgery.*
- liver, as risk factor for acute renal failure, 710
- Transurethral resection of the prostate, **883-897**
 - advantages of regional anesthesia over general anesthesia, 888-891
 - alternatives to, 895
 - anesthetic techniques, 888
 - complications, absorption of irrigating solution, 891
 - ammonia toxicity, 892-893
 - bleeding and coagulopathy, 894
 - circulatory overload, hyponatremia, and hypo-osmolality, 891-892
 - glycine toxicity, 892
 - hypothermia, 894
 - perforation of bladder, 893
 - transient bacteremia and septicemia, 893
 - TURP syndrome, 894-895
 - irrigation solutions, 884-885
 - neuroanatomy of penis, prostate, and bladder, 885-887
 - pathophysiology of hypertrophic prostate, 883-884
 - surgical procedures, 884
- Trauma surgery, as risk factor for acute renal failure, 709, 710
- Treatment redirection, for geriatric patients, 171-172
- Trendelenburg position, disadvantages of, in aged patients, 115-116
- Tube feeding, in terminally ill, 202
- TURP syndrome, as complication of transurethral resection of prostate, 894-895
- Ularitide, for prevention of acute renal failure, 713
- Ultrafiltration, in dialysis, 854, 857-858
- Upper airway obstruction, postoperative, in pediatric patients, 617-618
- Upper extremity nerve blocks, **297-317**
 - anatomy and, 297-301, 302
 - common approaches and techniques for, 307-308
 - axillary blockade, 311-312
 - infraclavicular block, 310-311
 - interscalene block, 308-309
 - intravenous regional anesthesia, 312-313

- Upper extremity nerve blocks (*Continued*)
 isolated peripheral nerve blocks, 313-314
 supraclavicular block, 309-310
 decreasing latency and beating the clock, 301, 303-305
 future of, 314-315
 prolonging, 305-307
 Uremia, opioids in patients with, 930
 Uremic coagulopathy, in patients with chronic renal failure, 869
 Urethra, neuroanatomy of, 885-886
 prostatic, neuroanatomy of, 886-887
 Urinary tract stone disease, treatment of.
 See *Extracorporeal shock wave lithotripsy and percutaneous nephrolithotomy.*
 Urotilatin, for renal preservation, 760-761
 Uterine perfusion, and regional anesthesia for obstetrics, 397
- Vascular surgery, anesthesia-related complications after, 96
 regional vs. general anesthesia in, 410-413
 Vascular system, affecting positioning of aged patients, 109-112
 Vasoconstrictor responses, in normal regulation of renal perfusion, 792-795
 Vasodilator responses, in normal regulation of renal perfusion, 796-798
 Vasomotor nephropathy, acute tubular necrosis, 798-799
- cardiopulmonary bypass, 803-804
 liver failure (hepatorenal syndrome), 802-803
 nephrotoxic (drug-induced), angiotensin-converting enzyme inhibitors, 804-805
 cyclosporine A, 805
 nonsteroidal anti-inflammatory drugs, 804
 renal blood flow regulation, autoregulation, and, 791-807
 septic shock, 800
 vasopressor therapy in, 801-802
 Vasopressin, in cardiopulmonary resuscitation in the elderly, 151
 Vasopressors, for maternal hypotension from regional anesthesia for obstetrics, 399-400
 Vecuronium, pharmacology of, in elderly patients, 24-26
 Venous stiffening, as effect of cardiovascular and autonomic aging, 38
 Ventilatory drive and control, alterations in, in elderly, 53-54
 Verapamil, for renal preservation, 757
 Volume loading, for intraoperative prevention of renal failure, 731-732
 Vomiting, postoperative, 577
 in pediatric patients, 619-621
 in terminally ill patients, 195-196
